Simple tools to build complex skills

The SIP Abacus programme uses three main tools to develop essential learning skills:

Why SIP Abacus is unique

- No homework means no added burden on your child or you!
- Regular feedback provided to parents
- Dedicated portal for parents to track progress
- Free extra sessions if the child is unable to understand a concept
- Free make-up sessions in case of absence**

5x better or your money back

When you enrol your child in our programme, we offer you a guarantee: We will make your child five times better or we shall refund you **\$2,000.**

FAQs

Q: Is this a math programme or tuition?

A: SIP Abacus is an overall brain development programme. It focuses on holistic development and learning skills which significantly improves children's concentration and learning skills and not just mathematics.

Q: Are the classes online?

A: Classes are available both at our centres across New Zealand and online. Each online class is for 90 minutes while the classroom sessions are 75 minutes each.

SIP abacus
success assured
For 5 to 12 year old children

WE PROMISE TO MAKE YOUR CHILD 5X BETTER

Trained over 700,000 children

- 01** Do you feel that the school syllabus is not challenging enough for your child and she or he can do better?
- 02** Do you feel that your child spends too much time on devices?
- 03** Do you feel that your child has a very short attention span and doesn't follow your instructions at home?

If you answered yes to any of these questions, your child may have hidden potential he or she is not utilising fully. In some cases, they may have a shorter attention span due to over exposure to devices.

However, they are not alone. Recent studies have shown that New Zealand students have some of the worst math and science scores among OECD countries*.

Fortunately, there's a solution.

*According to the Trends in International Mathematics & Science Study (TIMSS) conducted in 2019.

At SIP Abacus, we make your child 5x better - Guaranteed!

The SIP Abacus programme is a unique systematic training programme that helps children between the ages of 5 and 12 develop higher levels of concentration and an absorbent mind.

It builds everything from concentration and arithmetic skills to visual memory, observation skills, listening skills and confidence. With SIP Abacus, your child will be able to learn better and quicker, whether that is maths, music or swimming. This international programme has helped over 700,000 students in countries across the world become better learners. Not convinced?

Let's do a quick exercise.

What is

$$373 + 453 + 295 + 445 - 200 = ?$$

9-year-old Aameena, an SIP Abacus student can solve it in **0.43 seconds**. That's right, less than a second, and that too without a calculator.

A programme for all-round brain development

Our programme is designed to develop both hemispheres of the brain. Research has shown that learners use both their right and left hemispheres of the brain to solve math problems while non-abacus learners use just their left brain.
